

Auto-level Adjustment on Folder Images in PaintNET

This set of macros automatically performs auto-level adjustment PaintNET operation on all images in selected folder and its sub-folders. The macro creates a copy of all the images in a destination folder. The macro works only with .jpg files.

How to run the macro

1. Make sure you have PaintNET program installed and you have selected English language. The macro was tested on version 4.x.
2. Run macro "Paint.NET - auto-level adjust all files"

3. In the form shown fill all the fields and follow all the error messages that may show up (such as destination folder does not exist).
